# OUTSTANDING ENVIRONMENTAL PERFORMANCE

## › Simitri HD Polymerised Toner

Comparison of CO<sub>2</sub> emissions during the production of Simitri toner and pulverised toner

Konica Minolta's own Polymerised Toner technology achieves high image quality. The toner fuses at low temperature to bring the overall reduction of power consumption and CO<sub>2</sub> emission, and saving TCO. CO<sub>2</sub> emission in the production process can also be greatly reduced, compared to pulverised toner.

## › Toner loop mechanism

With the Konica Minolta's Toner Loop Mechanism technology, any toner that has not been transferred to the paper will be collected, circulated and reused to eliminate toner wastage.

## › Double-sided print and double-sided scan

2-sided document can be output by the Auto Duplex Unit AD-509 (optional) to reduce paper amount.

Any multiple 2-sided documents can be scanned automatically all at once with the Reverse Automatic Document Feeder DF-625 (Optional). Scan performance (1-sided per minute)
